

Dear Graduate Programme Coordinator,

I am writing to express my enthusiasm for the Software Engineering Focus-Track Graduate Programme within Information Technology Asia at Julius Baer, commencing on 1 October 2024. With a Bachelor of Science in Data Science and Analytics and a second major in Computer Science from the National University of Singapore, I am eager to embark on this journey to unleash my full potential in wealth management technology.

Julius Baer's commitment to empowering individuals to create value beyond wealth resonates deeply with me. I am particularly drawn to the programme's structure, offering three rotations and an international assignment in Switzerland. This aligns perfectly with my aspiration to gain a comprehensive understanding of private banking technologies and contribute meaningfully to Julius Baer's DevOps transformation journey.

My academic background, combined with internships at Wilhelmsen Ship Services and Ocean Network Express, has equipped me with a solid foundation in microservice/API development, cloud architecture, and agile methodologies. I am enthusiastic about applying these skills in front-end development for mobile/web applications and embracing test-driven and behavior-driven development automation frameworks within Julius Baer's global teams.

I am excited about the opportunity to contribute to shaping the future of wealth management with Julius Baer and am keen to further develop my skills in application development, architecture, and platform engineering. I am a Singaporean citizen, eligible for employment authorization, and look forward to potentially starting my international career journey with Julius Baer.

Thank you for considering my application. I am eager to contribute to and learn from the esteemed team at Julius Baer and am looking forward to the opportunity to discuss my application further.

Warm regards,

Poh Yu Jie
